

FLAGSHIP COACHING PROGRAMME

The Physique Builder Blueprint

A 12-week full body training system for beginner and intermediate lifters who want structure, not guesswork.

EVIDENCE-BASED TRAINING & NUTRITION

12 WEEKS

36 WORKOUTS

FULL PROGRAMME

You're About To Get Serious About Your Physique

First — congratulations. Buying this programme means you're done guessing. You've decided to follow a real, structured plan instead of chasing whatever a random video told you to do this week.

This isn't a generic "12-week challenge." The Physique Builder Blueprint is built on the same principles we use with our 1:1 coaching clients: progressive overload, sensible exercise selection, honest effort tracking, and nutrition that actually fits your life.

Over the next 12 weeks you'll train three full-body sessions a week, get stronger on the lifts that matter most, and learn exactly why each part of the plan works — so by the end, you won't need us anymore. You'll be able to write your own programmes.

COACH'S TIP

Read Sections 1–4 fully before your first workout. Twenty minutes now saves weeks of wasted effort later.

Let's get to work.

— The FitnessForge Coaching Team

How This Book Is Organised

Each part is its own linked chapter — click any title to jump straight there, or work through in order from front to back.

How To Use This Programme

The Blueprint is built to be worked through in order. Here's the simple path.

1. Read The Foundations

Work through the education chapters once, start to finish. They explain every term and concept you'll see in the workouts, so nothing feels confusing later.

2. Learn Your Week

Each week has three full-body workouts: A, B and C. Train them on non-consecutive days where possible (e.g. Mon / Wed / Fri).

3. Log Every Session

Write down the weight, reps and RPE for every set. This log is what tells you when — and how — to progress.

4. Check In Weekly

Use the Weekly Check-In and Reflection pages to track how training is actually going beyond the numbers on the bar.

QUICK WIN

Print or duplicate the workout log and tracker pages — you'll use them 3x a week for 12 weeks, so having spares ready removes friction on busy days.

Key Takeaways

- Read the foundations before Week 1.
- Train Workouts A, B and C each week, in any order, with a rest day between sessions where possible.
- Log everything — the log drives your progression, not guesswork.

Who This Programme Is For

✔ This Is Built For You If...

- ☐ You're a beginner or intermediate lifter (roughly 0–3 years of consistent training).
- ☐ You want to build muscle, lose fat, or both — a general "get stronger and leaner" goal.
- ☐ You can commit to 3 gym sessions a week for 12 weeks.
- ☐ You want a plan you can trust, not another opinion to weigh up.
- ☐ You're willing to log your workouts honestly.

⚠ This Is Not For You If...

- ☐ You're an advanced/competitive lifter needing a specialised peaking block.
- ☐ You have an injury or medical condition and haven't cleared exercise with a doctor.
- ☐ You're looking for a plan with no gym access at all (this uses standard gym equipment).

COMMON MISTAKE

Jumping straight into advanced training splits before mastering the basics. Master this programme first — the fancy stuff can wait.

EXPECTATIONS

What Results To Expect

Results depend on consistency, nutrition and starting point — but here's a realistic, evidence-informed picture over 12 weeks.

AREA	REALISTIC 12-WEEK OUTCOME
Strength	Noticeable increases on your main lifts — often 10–30% on beginner lifts as your nervous system and technique improve.
Muscle	Visible muscle growth is realistic, especially for newer lifters. Expect gradual, steady change — not overnight transformation.
Body Fat	If eating in a deficit, expect gradual, sustainable fat loss (roughly 0.3–0.7kg/week is a healthy pace for most people).
Skill & Confidence	You'll move better, understand training language, and know exactly what to do when you walk into the gym.

SCIENCE BEHIND IT

Body recomposition (building muscle while losing fat at the same time) is well documented in beginners and returning lifters — your training age is your biggest advantage right now.

Key Takeaways

- Expect steady, not instant, progress — this is a 12-week foundation, not a miracle cure.
- Strength gains usually show up before visual changes — trust the log, not the mirror.
- Results compound: what you build here sets up everything that comes after.

PART TWO

Training Foundations

Everything you need to understand before you touch a barbell — the principles, the language, and the safety rules that make this programme work.

The Principles Of Building Muscle

Muscle growth isn't complicated. It comes down to a handful of proven principles.

Progressive Overload

Your muscles adapt to demand. Gradually lifting more weight, doing more reps, or adding sets over time is the single biggest driver of growth.

Sufficient Volume

You need enough hard sets per muscle group each week — this programme is pre-built to hit that target for you.

Proximity To Failure

Sets need to be genuinely challenging (see RPE, p.9) — not so easy they don't stimulate growth, not so hard they wreck recovery.

Consistency Over Time

Muscle is built over months, not days. Showing up for all 36 workouts matters more than any single "perfect" session.

SCIENCE BEHIND IT

Research consistently shows muscle growth is driven primarily by mechanical tension from resistance training, with volume and progressive overload as the main levers you control.

Key Takeaways

- Growth = progressive overload + enough volume + real effort + time.
- You don't need to chase novelty — you need to chase progression on proven exercises.

Action Steps

- 1 Log every set so you can see your progress week to week.
- 2 Aim to add a little weight or a rep whenever your target RPE allows it.

Training Terminology Explained

Your quick-reference glossary — bookmark this page.

Set

A block of consecutive reps performed without resting, e.g. "3 sets of 10."

RPE

Rate of Perceived Exertion — how hard a set felt, on a scale of 1–10. Explained fully on p.9.

Rest Period

Time spent recovering between sets before the next one.

Compound Exercise

A multi-joint movement working several muscle groups, e.g. squat, bench press.

Failure

The point where you physically cannot complete another rep with good form.

Range Of Motion (ROM)

How far a joint moves during an exercise — usually, the fuller the better.

Rep

One complete movement of an exercise, from start to finish.

Tempo

The speed of each phase of a rep, e.g. lowering, pausing, lifting. Explained on p.8.

Progressive Overload

Gradually increasing training demand over time to keep forcing adaptation.

Isolation Exercise

A single-joint movement targeting one muscle group, e.g. bicep curl.

Deload

A planned week of reduced training stress to aid recovery.

Superset

Two exercises performed back-to-back with no rest in between.

How To Warm Up & Progress Safely

Warming Up Properly

A good warm-up raises your body temperature, primes the nervous system and rehearses the movement pattern you're about to load.

- ☐ 3-5 minutes of light cardio (bike, row, brisk walk)
- ☐ 2-3 warm-up sets of your first exercise, building weight gradually
- ☐ Stop warming up once a set feels light and technique feels solid

Progressing Safely

Progress should feel almost boring — small, controlled increases beat big jumps that wreck your technique.

- ☐ Hit the top of your rep range at your target RPE before adding weight
- ☐ Add the smallest possible increment (2.5kg on most lifts)
- ☐ If a lift stalls for 2-3 sessions, hold the weight and focus on form

COMMON MISTAKE

Skipping warm-up sets to "save time," then missing lifts you'd normally hit. Two minutes of warm-up protects your whole session.

COACH'S TIP

If a joint feels achy, add an extra warm-up set at very light weight through a full range of motion before loading up.

Technique Fundamentals & Exercise Selection

Technique Fundamentals

- ☐ Move through a full, controlled range of motion on every rep
- ☐ Keep the working muscle under tension — avoid bouncing or jerking the weight
- ☐ Brace your core before heavy compound lifts (squat, deadlift, press)
- ☐ Every exercise in this book has a Technique Cue — read it before your first set

Exercise Selection Guide

Every workout gives you a Primary exercise plus two Substitution Options. Swap only when you need to:

- ☐ Equipment is unavailable or busy
- ☐ An exercise causes joint discomfort — swap for a substitution instead of pushing through pain
- ☐ Otherwise, stick with the primary exercise for consistent progress tracking

Key Takeaways

- Technique first, weight second — a smaller ROM with heavier weight is not progress.
- Substitutions exist for a reason: use them, don't train through pain.

Rest Periods, Tempo & RPE Explained

🕒 Rest Periods

Bigger compound lifts (squat, deadlift, press) need 3–5 min to recover strength for the next set. Smaller isolation moves only need 1–2 min. Rest is written on every workout page — respect it.

Tempo

Written as 4 numbers, e.g. 3-1-1-0: seconds lowering – pause at stretch – lifting – pause at top. Slower lowering (eccentric) increases muscle tension and control.

RPE

Rate of Perceived Exertion, 1–10. RPE 7 = you could do about 3 more reps. RPE 9 = about 1 more rep. RPE 10 = true failure.

RPE	REPS LEFT IN THE TANK	FEELS LIKE
6	4+ reps left	Comfortable, warm-up territory
7	~3 reps left	Working set, controlled effort
8	~2 reps left	Hard, form still solid
9	~1 rep left	Very hard, last rep is a grind
10	0 reps left	True muscular failure

How To Train Close To Failure

Effort matters — but "close to failure" beats "at failure" on every set, every time.

Why Not Train To Failure Every Set?

Training to true failure on every set spikes fatigue and slows recovery, making your next session (and next week) worse. Save true failure for your very last set of an exercise, if at all.

How To Judge It

Ask: "could I do 2–3 more good reps?" If yes, you're around RPE 7–8 — right where most working sets should sit. Trust the target RPE listed on each workout page.

FREQUENTLY ASKED QUESTION

"How do I know if I'm pushing hard enough?" If your last set of every exercise never gets your heart rate up or leaves your muscles burning at all, you're probably leaving reps in reserve every set — nudge the RPE up slightly next session.

Key Takeaways

- Target RPE, don't chase failure on every set.
- Consistency at the right effort beats occasional all-out sets.

Recovery, Sleep & Cardio

Recovery Guidelines

Muscle is rebuilt between sessions, not during them. Give each muscle group 48 hours before hitting it hard again — this programme's full-body layout already handles that spacing for you.

Sleep Optimisation

Aim for 7–9 hours most nights. Keep a consistent sleep/wake time, dim lights an hour before bed, and keep your room cool and dark — sleep is the biggest free performance upgrade available.

Cardio Recommendations

2–3 sessions of 20–30 min moderate cardio per week supports recovery and heart health without interfering with strength gains. Keep it easy on lower-body training days.

REMEMBER THIS

You don't get stronger from the workout — you get stronger from what happens after it. Sleep, food and recovery are part of the programme, not extras.

PART THREE

Nutrition

Training builds the stimulus. Nutrition builds the results.
Here's everything you need, kept simple and practical.

Nutrition Basics & Calories Explained

Nutrition doesn't need to be complicated to work.

The Only 3 Rules That Matter

- ☐ Eat roughly the right amount of calories for your goal
- ☐ Get enough protein daily
- ☐ Eat mostly foods you can sustain long-term

Calories Explained

A calorie is a unit of energy. Eat more than you burn and you gain weight; eat less and you lose it. This "energy balance" is the single biggest driver of body weight change — everything else fine-tunes it.

Fat Loss	Eat in a moderate calorie deficit
Muscle Gain	Eat at maintenance or a small surplus
Recomposition	Eat close to maintenance, prioritise protein & training

COACH'S TIP

Weigh yourself 3–4x a week, same conditions, and track the weekly average. Day-to-day swings are mostly water, not fat.

Protein, Carbohydrates & Fats

Protein

Builds and repairs muscle. Aim for roughly 1.6–2.2g per kg of bodyweight daily, spread across 3–4 meals. This is the one nutrient beginners most often under-eat.

Carbohydrates

Your body's preferred fuel for training. Carbs around your workouts help you train harder and recover faster — don't fear them.

Fats

Essential for hormone production. Aim for roughly 0.6–1g per kg of bodyweight daily from a mix of sources — nuts, oils, oily fish, dairy.

A Simple Visual: Where Your Calories Come From

COMMON MISTAKE

Cutting carbs or fat to near-zero. Both support training performance and hormones — extremes usually backfire.

How To Build Your Own Meals

Use this simple formula for every meal — no scales required.

The Plate Method

- ☐ 1 palm-sized portion of protein (chicken, fish, eggs, tofu, lean beef)
- ☐ 1–2 fist-sized portions of carbs (rice, potatoes, oats, bread, fruit)
- ☐ 1–2 fistfuls of vegetables
- ☐ 1 thumb of added fat (oil, nuts, cheese, avocado)

Building A Day

Repeat the plate method across 3–4 meals a day. This alone gets most people within range of their protein and calorie targets without ever tracking a single gram.

QUICK WIN

Build your first meal of tomorrow using this method tonight — momentum beats a perfect plan you never start.

Hydration & Supplements

△ Hydration

Aim for roughly 2–3 litres of water daily, more on hot or heavy training days. Even mild dehydration can reduce strength and focus in the gym.

Supplements – What's Actually Worth It

Protein Powder Convenient way to hit protein targets — not essential if food covers it

Creatine Monohydrate 3–5g daily — one of the most well-evidenced supplements for strength & muscle

Caffeine Can modestly improve training performance and focus

Everything Else Mostly marginal — nail food, training and sleep first

Key Takeaways

- Supplements support a good diet — they don't replace one.
- Only creatine and caffeine have strong, consistent evidence for most lifters.

Action Steps

- 1 Set a daily water target and track it for one week.
- 2 If budget allows, add 3–5g of creatine monohydrate daily — timing doesn't matter.

PART FOUR

Weeks 1 – 4

Three full-body workouts a week. Log every set — the numbers on this page are how you know it's working.

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Back Squat GRASP EACH SIDE OF THE BAR WITH A SOMEWHAT WIDER THAN SHOULDER WIDTH GRIP THAT FEELS COMFORTABLE FOR YOU. MAKE SURE TO SQUAT THROUGH THE FULL RANGE OF MOTION. IF YOU CAN'T, LOWER THE WEIGHT. HAVE YOUR FEET AT A SHOULDER WIDTH STANCE. Swap: Smith Machine Squat or DB bulgarian Split	1	6-8	~6	3-5 min				☐
Barbell Bench Press TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE, SQUEEZE YOUR SHOULDER BLADES, AND STAY FIRM ON THE BENCH. Swap: DB Bench Press or Machine Chest Press	1	8-10	~6	3-5 min				☐
Wide Grip Lat Pulldown LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Neutral Grip Lat Pulldown or Assisted Pull Up	1	10-12	~6	2-3 min				☐
Romanian Deadlift LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE CABLE MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: DB RDL or Stiff-leg Deadlift	1	6-8	~7	2-3 min				☐
Assisted Dip TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE AND LEAN YOUR TORSO FORWARD 15 DEGREES. Swap: Close Grip Bench Press or Plate Loaded Dip	1	8-10	~7	1-2 min				☐
Standing Calf Raise PUSH THROUGH THE BALLS OF YOUR FEET TO RAISE YOUR HEELS FULLY UPWARD WHILE KEEPING YOUR KNEES STRAIGHT AND YOUR TRUNK UPRIGHT. DON'T BOUNCE. Swap: Leg Press Calf Raise or Seated Calf Raise	1	8-10	~7	1-2 min				☐
EZ Bar Bicep Curl KEEP YOUR UPPER ARMS FIXED AT YOUR SIDES (RATHER THAN ALLOWING YOUR UPPER ARMS TO SWING FORWARD). Swap: DB Supinated Curl or Incline DB Curl	1	8-10	~7	1-2 min				☐

Weekly Notes

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Deadlift <i>BRACE YOUR LATS, CHEST TALL, HIPS HIGH, PULL THE SLACK OUT OF THE BAR PRIOR TO MOVING IT OFF THE GROUND</i> Swap: Barbell RDL or Defict Conventional Deadlift	1	6-8	~7	3-5 min				☐
Barbell Overhead Press <i>SQUEEZE YOUR GLUTES TO KEEP YOUR TORSO UPRIGHT, CLEAR YOUR HEAD OUT OF THE WAY, PRESS UP AND SLIGHTLY BACK</i> Swap: DB shoulder Press or Machine Shoulder press	1	8-10	~6	3-5 min				☐
Chest-supported Row <i>Row Seated Neutral Grip Cable Row FOCUS ON SQUEEZING YOUR SHOULDER BLADES TOGETHER AS YOU PULL THE WEIGHT TOWARDS YOU. KEEP YOUR SHOULDERS DOWN (AVOID SHRUGGING).</i> Swap: Incline Chest Supported DB or	1	10-12	~6	2-3 min				☐
Leg Extension <i>FOCUS ON SQUEEZING YOUR QUADS TO MAKE THE WEIGHT MOVE</i> Swap: Single-Leg Leg extension or Accentuated Eccentric Leg Extension	1	10-12	~6	1-2 min				☐
Cable Flye <i>KEEP YOUR ELBOWS SLIGHTLY BENT AT A CONSTANT ANGLE WHILE SQUEEZING YOUR PECS TO MOVE THE WEIGHT</i> Swap: Pec Deck or DB Flye	1	10-12	~7	1-2 min				☐
Cable Crunch <i>FOCUS ON FLEXING YOUR SPINE (ROUNDING YOUR BACK), DON'T YANK YOUR HEAD WITH YOUR ARMS</i> Swap: Machine Crunch or Ab Wheel Rollout	1	12-15	~7	1-2 min				☐
DB Skull Crusher <i>KEEP YOUR ELBOWS IN LINE WITH THE TOP OF YOUR HEAD, DON'T LET YOUR UPPER ARM MOVE</i> Swap: Overhead Cable Extension or EZ bar Skull Crusher	1	10-12	~7	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
DB Walking Lunge 10 STEPS EACH LEG. TAKE MEDIUM STRIDES, LET YOUR TORSO LEAN FORWARD Swap: Bulgarian Split Squat or Smith machine Reverse Lunge	1	8-10	~6	3-5 min				☐
DB Incline Press USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS. Swap: Barbell Incline Press or Machine Incline Press	1	6-8	~6	3-5 min				☐
Reverse Grip Lat Pulldown PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	1	10-12	~6	2-3 min				☐
Barbell Hip Thrust TUCK YOUR CHIN AND RIB CAGE DOWN, ONLY MOVE YOUR HIPS. USE A PAD Swap: DB Hip Thrust or Glute Focused Leg Press	1	10-12	~7	1-2 min				☐
Seated Face Pull PULL YOUR ARMS BACK AND OUT Swap: Reverse Pec Deck or Single Arm 45° Cable Rear Delt Fly	1	10-12	~7	1-2 min				☐
DB Lateral Raise RAISE THE DUMBBELL "OUT" NOT "UP"; MIND MUSCLE CONNECTION WITH MIDDLE FIBERS Swap: Cable Lateral Raise or Pin Loaded Machine Lateral Raise	1	12-15	~7	1-2 min				☐
Lying Leg Curl FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE Swap: Seated Leg Curl or Single-Leg Lying Leg Curl	1	10-12	~7	1-2 min				☐

Weekly Notes

DB Walking Lunge 10 STEPS EACH LEG. TAKE MEDIUM STRIDES, LET YOUR TORSO LEAN FORWARD Swap: Bulgarian Split Squat or Smith machine Reverse Lunge	2	8-10	~7	3-5 min				☐
DB Incline Press USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS. Swap: Barbell Incline Press or Machine Incline Press	2	6-8	~7	3-5 min				☐
Reverse Grip Lat Pulldown PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	2	10-12	~7	2-3 min				☐
Barbell Hip Thrust TUCK YOUR CHIN AND RIB CAGE DOWN, ONLY MOVE YOUR HIPS. USE A PAD Swap: DB Hip Thrust or Glute Focused Leg Press	2	10-12	~8	1-2 min				☐
Seated Face Pull PULL YOUR ARMS BACK AND OUT Swap: Reverse Pec Deck or Single Arm 45° Cable Rear Delt Fly	2	10-12	~8	1-2 min				☐
DB Lateral Raise RAISE THE DUMBBELL "OUT" NOT "UP"; MIND MUSCLE CONNECTION WITH MIDDLE FIBERS Swap: Cable Lateral Raise or Pin Loaded Machine Lateral Raise	2	12-15	~8	1-2 min				☐
Lying Leg Curl FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE Swap: Seated Leg Curl or Single-Leg Lying Leg Curl	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Back Squat GRASP EACH SIDE OF THE BAR WITH A SOMEWHAT WIDER THAN SHOULDER WIDTH GRIP THAT FEELS COMFORTABLE FOR YOU. MAKE SURE TO SQUAT THROUGH THE FULL RANGE OF MOTION. IF YOU CAN'T, LOWER THE WEIGHT. HAVE YOUR FEET AT A SHOULDER WIDTH STANCE. Swap: Smith Machine Squat or DB bulgarian Split	2	6-8	~7	3-5 min				☐
Barbell Bench Press TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE, SQUEEZE YOUR SHOULDER BLADES, AND STAY FIRM ON THE BENCH. Swap: DB Bench Press or Machine Chest Press	2	8-10	~7	3-5 min				☐
Wide Grip Lat Pulldown LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Neutral Grip Lat Pulldown or Assisted Pull Up	2	10-12	~7	2-3 min				☐
Romanian Deadlift LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE CABLE MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: DB RDL or Stiff-leg Deadlift	2	6-8	~7	2-3 min				☐
Assisted Dip TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE AND LEAN YOUR TORSO FORWARD 15 DEGREES. Swap: Close Grip Bench Press or Plate Loaded Dip	2	8-10	~7	1-2 min				☐
Standing Calf Raise PUSH THROUGH THE BALLS OF YOUR FEET TO RAISE YOUR HEELS FULLY UPWARD WHILE KEEPING YOUR KNEES STRAIGHT AND YOUR TRUNK UPRIGHT. DON'T BOUNCE. Swap: Leg Press Calf Raise or Seated Calf Raise	2	8-10	~8	1-2 min				☐
EZ Bar Bicep Curl KEEP YOUR UPPER ARMS FIXED AT YOUR SIDES (RATHER THAN ALLOWING YOUR UPPER ARMS TO SWING FORWARD). Swap: DB Supinated Curl or Incline DB Curl	2	8-10	~8	1-2 min				☐

Weekly Notes

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Deadlift BRACE YOUR LATS, CHEST TALL, HIPS HIGH, PULL THE SLACK OUT OF THE BAR PRIOR TO MOVING IT OFF THE GROUND Swap: Barbell RDL or Deficit Conventional Deadlift	2	6-8	~7	3-5 min				☐
Barbell Overhead Press SQUEEZE YOUR GLUTES TO KEEP YOUR TORSO UPRIGHT, CLEAR YOUR HEAD OUT OF THE WAY, PRESS UP AND SLIGHTLY BACK Swap: DB shoulder Press or Machine Shoulder press	2	8-10	~7	3-5 min				☐
Chest-supported Row Row Seated Neutral Grip Cable Row FOCUS ON SQUEEZING YOUR SHOULDER BLADES TOGETHER AS YOU PULL THE WEIGHT TOWARDS YOU. KEEP YOUR SHOULDERS DOWN (AVOID SHRUGGING). Swap: Incline Chest Supported DB or	2	10-12	~7	2-3 min				☐
Leg Extension FOCUS ON SQUEEZING YOUR QUADS TO MAKE THE WEIGHT MOVE Swap: Single-Leg Leg extension or Accentuated Eccentric Leg Extension	2	10-12	~8	1-2 min				☐
Cable Flye KEEP YOUR ELBOWS SLIGHTLY BENT AT A CONSTANT ANGLE WHILE SQUEEZING YOUR PECS TO MOVE THE WEIGHT Swap: Pec Deck or DB Flye	2	10-12	~8	1-2 min				☐
Cable Crunch FOCUS ON FLEXING YOUR SPINE (ROUNDING YOUR BACK), DON'T YANK YOUR HEAD WITH YOUR ARMS Swap: Machine Crunch or Ab Wheel Rollout	2	12-15	~8	1-2 min				☐
DB Skull Crusher KEEP YOUR ELBOWS IN LINE WITH THE TOP OF YOUR HEAD, DON'T LET YOUR UPPER ARM MOVE Swap: Overhead Cable Extension or EZ bar Skull Crusher	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
DB Walking Lunge 10 STEPS EACH LEG. TAKE MEDIUM STRIDES, LET YOUR TORSO LEAN FORWARD Swap: Bulgarian Split Squat or Smith machine Reverse Lunge	2	8-10	~7	3-5 min				☐
DB Incline Press USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS. Swap: Barbell Incline Press or Machine Incline Press	2	6-8	~7	3-5 min				☐
Reverse Grip Lat Pulldown PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	2	10-12	~7	2-3 min				☐

Seated Face Pull PULL YOUR ARMS BACK AND OUT Swap: Reverse Pec Deck or Single Arm 45° Cable Rear Delt Fly	2	10-12	~8	1-2 min				☐
DB Lateral Raise RAISE THE DUMBBELL "OUT" NOT "UP", MIND MUSCLE CONNECTION WITH MIDDLE FIBERS Swap: Cable Lateral Raise or Pin Loaded Machine Lateral Raise	2	12-15	~8	1-2 min				☐
Lying Leg Curl FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE Swap: Seated Leg Curl or Single-Leg Lying Leg Curl	2	10-12	~8	1-2 min				☐

Weekly Notes

PART FOUR

Weeks 5 – 8

Three full-body workouts a week. Log every set — the numbers on this page are how you know it's working.

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Back Squat GRASP EACH SIDE OF THE BAR WITH A SOMEWHAT WIDER THAN SHOULDER WIDTH GRIP THAT FEELS COMFORTABLE FOR YOU. MAKE SURE TO SQUAT THROUGH THE FULL RANGE OF MOTION. IF YOU CAN'T, LOWER THE WEIGHT. HAVE YOUR FEET AT A SHOULDER WIDTH STANCE. Swap: Smith Machine Squat or DB bulgarian Split	2	6-8	~7	3-5 min				☐
Barbell Bench Press TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE, SQUEEZE YOUR SHOULDER BLADES, AND STAY FIRM ON THE BENCH. Swap: DB Bench Press or Machine Chest Press	2	8-10	~7	3-5 min				☐
Wide Grip Lat Pulldown LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE CABLE MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Neutral Grip Lat Pulldown or Assisted Pull Up	2	10-12	~7	2-3 min				☐
Romanian Deadlift LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: DB RDL or Stiff-leg Deadlift	2	6-8	~7	2-3 min				☐
Assisted Dip TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE AND LEAN YOUR TORSO FORWARD 15 DEGREES. Swap: Close Grip Bench Press or Plate Loaded Dip	2	8-10	~7	1-2 min				☐
Standing Calf Raise PUSH THROUGH THE BALLS OF YOUR FEET TO RAISE YOUR HEELS FULLY UPWARD WHILE KEEPING YOUR KNEES STRAIGHT AND YOUR TRUNK UPRIGHT. DON'T BOUNCE. Swap: Leg Press Calf Raise or Seated Calf Raise	2	8-10	~8	1-2 min				☐
EZ Bar Bicep Curl KEEP YOUR UPPER ARMS FIXED AT YOUR SIDES (RATHER THAN ALLOWING YOUR UPPER ARMS TO SWING FORWARD). Swap: DB Supinated Curl or Incline DB Curl	2	8-10	~8	1-2 min				☐

Weekly Notes

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Deadlift <i>BRACE YOUR LATS, CHEST TALL, HIPS HIGH, PULL THE SLACK OUT OF THE BAR PRIOR TO MOVING IT OFF THE GROUND</i> Swap: Barbell RDL or Defict Conventional Deadlift	2	6-8	~7	3-5 min				☐
Barbell Overhead Press <i>SQUEEZE YOUR GLUTES TO KEEP YOUR TORSO UPRIGHT, CLEAR YOUR HEAD OUT OF THE WAY, PRESS UP AND SLIGHTLY BACK</i> Swap: DB shoulder Press or Machine Shoulder press	2	8-10	~7	3-5 min				☐
Chest-supported Row <i>Row Seated Neutral Grip Cable Row FOCUS ON SQUEEZING YOUR SHOULDER BLADES TOGETHER AS YOU PULL THE WEIGHT TOWARDS YOU. KEEP YOUR SHOULDERS DOWN (AVOID SHRUGGING).</i> Swap: Incline Chest Supported DB or	2	10-12	~7	2-3 min				☐
Leg Extension <i>FOCUS ON SQUEEZING YOUR QUADS TO MAKE THE WEIGHT MOVE</i> Swap: Single-Leg Leg extension or Accentuated Eccentric Leg Extension	2	10-12	~8	1-2 min				☐
Cable Flye <i>KEEP YOUR ELBOWS SLIGHTLY BENT AT A CONSTANT ANGLE WHILE SQUEEZING YOUR PECS TO MOVE THE WEIGHT</i> Swap: Pec Deck or DB Flye	2	10-12	~8	1-2 min				☐
Cable Crunch <i>FOCUS ON FLEXING YOUR SPINE (ROUNDING YOUR BACK), DON'T YANK YOUR HEAD WITH YOUR ARMS</i> Swap: Machine Crunch or Ab Wheel Rollout	2	12-15	~8	1-2 min				☐
DB Skull Crusher <i>KEEP YOUR ELBOWS IN LINE WITH THE TOP OF YOUR HEAD, DON'T LET YOUR UPPER ARM MOVE</i> Swap: Overhead Cable Extension or EZ bar Skull Crusher	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
DB Walking Lunge 10 STEPS EACH LEG. TAKE MEDIUM STRIDES, LET YOUR TORSO LEAN FORWARD Swap: Bulgarian Split Squat or Smith machine Reverse Lunge	2	8-10	~7	3-5 min				☐
DB Incline Press USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS. Swap: Barbell Incline Press or Machine Incline Press	2	6-8	~7	3-5 min				☐
Reverse Grip Lat Pulldown PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	2	10-12	~7	2-3 min				☐
Barbell Hip Thrust TUCK YOUR CHIN AND RIB CAGE DOWN, ONLY MOVE YOUR HIPS. USE A PAD Swap: DB Hip Thrust or Glute Focused Leg Press	2	10-12	~8	1-2 min				☐
Seated Face Pull PULL YOUR ARMS BACK AND OUT Swap: Reverse Pec Deck or Single Arm 45° Cable Rear Delt Fly	2	10-12	~8	1-2 min				☐
DB Lateral Raise RAISE THE DUMBBELL "OUT" NOT "UP"; MIND MUSCLE CONNECTION WITH MIDDLE FIBERS Swap: Cable Lateral Raise or Pin Loaded Machine Lateral Raise	2	12-15	~8	1-2 min				☐
Lying Leg Curl FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE Swap: Seated Leg Curl or Single-Leg Lying Leg Curl	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout A – Squat & Push Focus

DB Skull Crusher KEEP YOUR ELBOWS IN LINE WITH THE TOP OF YOUR HEAD, DON'T LET YOUR UPPER ARM MOVE Swap: Overhead Cable Extension or EZ bar Skull Crusher	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
DB Walking Lunge 10 STEPS EACH LEG. TAKE MEDIUM STRIDE, LET YOUR TORSO LEAN FORWARD. WHILE KEEPING ONE FOOT ON THE GROUND, TAKE A FAIRLY LONG STEP STRAIGHT FOWARD WITH YOUR OTHER FOOT FAR ENOUGH AHEAD THAT YOU WILL BE ABLE TO CONTACT THE GROUND WITH YOUR REAR KNEE WHEN LUNGING DOWN, Swap: Bulgarain Split Squat or Smith machine Reverse Lunge	2	8-10	~7	3-5 min				☐
DB Incline Press USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS. Swap: Barbell Incline Press or Machine Incline Press	2	6-8	~7	3-5 min				☐
Reverse Grip Lat Pulldown PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	2	10-12	~7	2-3 min				☐
Barbell Hip Thrust TUCK YOUR CHIN AND RIB CAGE DOWN, ONLY MOVE YOUR HIPS. USE A PAD Swap: DB Hip Thrust or Glute Focused Leg Press	2	10-12	~8	1-2 min				☐
Seated Face Pull PULL YOUR ARMS BACK AND OUT Swap: Reverse Pec Deck or Single Arm 45° Cable Rear Delt Fly	2	10-12	~8	1-2 min				☐
DB Lateral Raise RAISE THE DUMBBELL "OUT" NOT "UP"; MIND MUSCLE CONNECTION WITH MIDDLE FIBERS Swap: Cable Lateral Raise or Pin Loaded Machine Lateral Raise	2	12-15	~8	1-2 min				☐
Lying Leg Curl FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE Ramping Block Swap: Seated Leg Curl or Single-Leg Lying Leg Curl	2	10-12	~8	1-2 min				☐

Weekly Notes

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Smith Machine Squat <i>your neck should be near a neutral position, like when you are normally standing upright. as you descend, it is natural for your torso to lean forward mildly at your hips, but avoid letting your lower back round or chest cave down from upper back rounding, keep your face straight ahead dont look down when squatting because igt will cause upper back rounding. it is also very important to do full ROM when doing qauts if your unable to go all the way done, lower the weight.</i> Swap: Barbell Back Squat or DB bulgarian Split	1	8-10	~7	3-5 min				☐
DB Bench Press <i>Throughout your set, keep your feet flat on the floor and your buttocks, upper back, and head in contact with the bench. at the end of the lifting phase, the dumbbells should be situated vertically over your shoulders</i> Swap: Barbell Bench Press or Machine Chest Press	1	10-12	~6	3-5 min				☐
Wide Grip Pull Up <i>While hanging on the bar straight elbows, simultaneously pull your shoulder blades down and mildly arch your middle and upper back to angle your chest slightly upward</i> Swap: Widel Grip Lat Pulldown or Assisted Pull Up	1	12-15	~6	2-3 min				☐
DB Romian Deadlift <i>Brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for smeone to strike your stomach with a punch. while allowing your knees to bend midly, sit your buttocks backward to hinge at your hips in a controlled manner as you keep you lower back flat, chest up, and core braced Close Grip smith machine</i> Swap: Barbell RDL or Stiff-leg Deadlift	1	8-10	~6	2-3 min				☐
Bench Press <i>Drive your feet into the ground and squeeze your glutes. simultaneously brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for someone to strike your stomach with a punch or forcible slap. focus on keeping your shoulder blades pulled back together to avoid losing your upper back tightness</i> Swap: Assisted Dip or Plate Loaded Dip	1	10-12	~6	1-2 min				☐
Seated Calf Raise <i>in a controlled manner, allow your heels to descend toward the ground through the available motion of your ankles. push through the balls of your feet to raise your heels into the air, at the top, your heels should be higher than the balls of your feet</i> Swap: Leg Press Calf Raise or Standing Calf Raise	1	10-12	~7	1-2 min				☐
Incline Bicep Curl <i>curl both dumbbells upward by bending at your elbows while keeping your upper arms fixed at</i>								

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Barbell RDL LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Barbell RDL or Deficit Conventional Deadlift	1	8-10	~6	3-5 min				☐
DB Shoulder Press PRESS THE DUMBBELLS UPWARD BY DRIVING YOUR ELBOWS UPWARD AND INWARD IN AN ARCHING MANNER AS YOU PROGRESSIVELY STRAIGHTEN YOUR ELBOWS UNTIL THEY ARE FULLY STRAIGHTENED WITH YOUR ARMS DIRECTED STRAIGHT UP TOWARD THE CEILING Seated Neutral Grip Cable Swap: DB shoulder Press or Machine Shoulder press	1	10-12	~6	3-5 min				☐
Row Row chest supported row PULL THE BAR BACK TOWARD YOUR TORSO BY DRIVING YOUR ELBOWS BACKWARD WHILE STIMULTANEOUSLY BENDING THEM AND PULLING YOUR SHOULDER BLADES TOGETHER Accentuated Eccentric Swap: Incline Chest Supported DB or	1	12-15	~6	2-3 min				☐
Leg Extension FULLY BEND ONE KNEE TO PULL THAT SIDES LEG AWAY FROM THE SHIN PAD WHILE CONTINUING TO KEEP YOUR OTHER LEG AGAINST THE PAD Swap: Single-Leg Leg extension or Leg extension	1	12-15	~7	1-2 min				☐
Peck Deck PULL YOUR SHOULDER BLADES BACK TOGETHER AND KEEP YOUR CHEST UP (KEEP THEM LIKE THIS THE WHOLE SET) PULL YOUR ARMS TOGETHER AS THE HANDLES MOVE TOWARD EACH OTHER UNTIL THEY ARE JUST ABOUT TO CONTACT EACH OTHER OR UNTIL THEY LIGHTLY CONTACT EACH OTHER Swap: Cable Flye or DB Flye	1	12-15	~7	1-2 min				☐
Ab Wheel Rollout DONT JUST BEND AT YOUR HIPS, USE YOUR ABS TO LOWER YOURSELF DOWN UNDER CONTROL AND PULL YOURSELF BACK UP. IF YOU DONT HAVE THE CORE STRENGTH TO GET ALL THE WAY EXTENDED AT THE BOTTOM, TRY TO PROGRESSIVELY INCREASE THE ROM WEEK TO WEEK Swap: Machine Crunch or Cable Crunch	1	12-15	~7	1-2 min				☐
DB Skull Crusher Swap: Overhead Cable Extension or EZ bar Skull Crusher	1	12-15	~7	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Bulgarain Split Squat SHIFT YOUR BODY WEIGHT INTO YOUR FRONT FOOT, KEEP TORSO FAIRLY UPRIGHT, KEEP YOUR KNEES ALIGNED WITH YOUR FEET Swap: Walking lunge or Smith machine Reverse Lunge	1	10-12	~6	3-5 min				☐
Barbell Incline Press DRIVE YOUR FEET INTO THE GROUND AND SQUEEZE YOUR GLUTES.FOCUS ON KEEPING SHOULDER BLADES PULLED BACK TOGETHER TO AVOID LOSING YOUR UPPER BACK TIGHTNESS Swap: Barbell Incline Press or Machine Incline Press	1	8-10	~6	3-5 min				☐
Chin Up PULL SHOULDER BLADES DOWN AND MILDLY ARCH YOUR MIDDLE AND UPPER BACK TO ANGLE YOUR CHEST SLIGHTLY UPWARD Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	1	12-15	~6	2-3 min				☐
DB Hip Thrust LIFT YOUR HIPS OFF THE GROUND BY DRIVING YOUR HEELS INTO THE GROUND AND SQUEEZING YOUR BUTTOCKS MUSCLES Swap: Barbell Hip Thrust or Glute Focused Leg Press	1	12-15	~7	1-2 min				☐
Single Arm 45° Cable Rear Delt Fly KEEP YOUR TORSO UPRIGHT WITH YOUR CHEST UP THROUGHOUT THE SET, MOVE THROUGH THE FULL RANGE OF MOTION YOUR SHOULDER MOBILITY PERMITS, WHICH SHOULD RESULT IN YOUR ELBOWS BEING SLIGHTLY BEHIND YOUR SHOULDERS OR AT LEAST HORIZONTALLY LEVEL WITH YOUR SHOULDERS AT THE END RANGE Swap: Reverse Pec Deck or Seated Face Pull	1	12-15	~7	1-2 min				☐
Cable Lateral Raise RAISE YOUR ARM THROUGH SHOULDER MOTION AND ALLOW YOUR SHOULDER BLADE TO MOVE NATURALLY, THE REST OF YOUR BODY SHOULD REMAIN STATIONARY Swap: DB Lateral Raise or Pin Loaded Machine Lateral Raise	1	12-15	~7	1-2 min				☐
Seated Leg Curl PULL YOUR TOES AND FEET BACK TOWARD YOUR SHINS BY MOVING AT YOUR ANKLES, AND MAINTAIN THIS ANKLE POSITION THROUGHOUT YOUR SET Swap: Lying Leg Curl or Single-Leg Lying Leg Curl	1	12-15	~7	1-2 min				☐

Weekly Notes

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Smith Machine Squat <i>your neck should be near a neutral position, like when you are normally standing upright. as you descend, it is natural for your torso to lean forward mildly at your hips, but avoid letting your lower back round or chest cave down from upper back rounding, keep your face straight ahead dont look down when squatting because igt will cause upper back rounding. it is also very important to do full ROM when doing qauts if your unable to go all the way done, lower the weight.</i> Swap: Barbell Back Squat or DB bulgarian Split	3	8-10	~7-8	3-5 min				☐
DB Bench Press <i>Throughout your set, keep your feet flat on the floor and your buttocks, upper back, and head in contact with the bench. at the end of the lifting phase, the dumbbells should be situated vertically over your shoulders</i> Swap: Barbell Bench Press or Machine Chest Press	3	10-12	~7-8	3-5 min				☐
Wide Grip Pull Up <i>While hanging on the bar straight elbows, simultaneously pull your shoulder blades down and mildly arch your middle and upper back to angle your chest slightly upward</i> Swap: Widel Grip Lat Pulldown or Assisted Pull Up	2	12-15	~7-8	2-3 min				☐
DB Romian Deadlift <i>Brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for smeone to strike your stomach with a punch. while allowing your knees to bend midly, sit your buttocks backward to hinge at your hips in a controlled manner as you keep you lower back flat, chest up, and core braced Close Grip smith machine</i> Swap: Barbell RDL or Stiff-leg Deadlift	2	8-10	~7-8	2-3 min				☐
Bench Press <i>Drive your feet into the ground and squeeze your glutes. simultaneously brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for someone to strike your stomach with a punch or forcible slap. focus on keeping your shoulder blades pulled back together to avoid losing your upper back tightness</i> Swap: Assisted Dip or Plate Loaded Dip	2	10-12	10	1-2 min				☐
Seated Calf Raise <i>in a controlled manner, allow your heels to descend toward the ground through the available motion of your ankles. push through the balls of your feet to raise your heels into the air, at the top, your heels should be higher than the balls of your feet</i> Swap: Leg Press Calf Raise or Standing Calf Raise	3	10-12	10	1-2 min				☐
Incline Bicep Curl <i>curl both dumbbells upward by bending at your elbows while keeping your upper arms fixed at</i>								

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Barbell RDL LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Barbell RDL or Deficit Conventional Deadlift	3	8-10	~7-8	3-5 min				☐
DB Shoulder Press PRESS THE DUMBBELLS UPWARD BY DRIVING YOUR ELBOWS UPWARD AND INWARD IN AN ARCHING MANNER AS YOU PROGRESSIVELY STRAIGHTEN YOUR ELBOWS UNTIL THEY ARE FULLY STRAIGHTENED WITH YOUR ARMS DIRECTED STRAIGHT UP TOWARD THE CEILING Seated Neutral Grip Cable Swap: DB shoulder Press or Machine Shoulder press	2	10-12	~7-8	3-5 min				☐
Row Row chest supported row PULL THE BAR BACK TOWARD YOUR TORSO BY DRIVING YOUR ELBOWS BACKWARD WHILE STIMULTANEOUSLY BENDING THEM AND PULLING YOUR SHOULDER BLADES TOGETHER Accentuated Eccentric Swap: Incline Chest Supported DB or	2	12-15	10	2-3 min				☐
Leg Extension FULLY BEND ONE KNEE TO PULL THAT SIDES LEG AWAY FROM THE SHIN PAD WHILE CONTINUING TO KEEP YOUR OTHER LEG AGAINST THE PAD Swap: Single-Leg Leg extension or Leg extension	3	12-15	10	1-2 min				☐
Peck Deck PULL YOUR SHOULDER BLADES BACK TOGETHER AND KEEP YOUR CHEST UP (KEEP THEM LIKE THIS THE WHOLE SET) PULL YOUR ARMS TOGETHER AS THE HANDLES MOVE TOWARD EACH OTHER UNTIL THEY ARE JUST ABOUT TO CONTACT EACH OTHER OR UNTIL THEY LIGHTLY CONTACT EACH OTHER Swap: Cable Flye or DB Flye	2	12-15	~7-8	1-2 min				☐
Ab Wheel Rollout DONT JUST BEND AT YOUR HIPS, USE YOUR ABS TO LOWER YOURSELF DOWN UNDER CONTROL AND PULL YOURSELF BACK UP. IF YOU DONT HAVE THE CORE STRENGTH TO GET ALL THE WAY EXTENDED AT THE BOTTOM, TRY TO PROGRESSIVELY INCREASE THE ROM WEEK TO WEEK Swap: Machine Crunch or Cable Crunch	2	12-15	10	1-2 min				☐
DB Skull Crusher Swap: Overhead Cable Extension or EZ bar Skull Crusher	3	12-15	~8-9	1-2 min				☐

Weekly Notes

Bulgarain Split Squat SHIFT YOUR BODY WEIGHT INTO YOUR FRONT FOOT, KEEP TORSO FAIRLY UPRIGHT, KEEP YOUR KNEES ALIGNED WITH YOUR FEET Swap: Walking lunge or Smith machine Reverse Lunge	3	10-12	~7-8	3-5 min				☐
Barbell Incline Press DRIVE YOUR FEET INTO THE GROUND AND SQUEEZE YOUR GLUTES.FOCUS ON KEEPING SHOULDER BLADES PULLED BACK TOGETHER TO AVOID LOSING YOUR UPPER BACK TIGHTNESS Swap: Barbell Incline Press or Machine Incline Press	3	8-10	~7-8	3-5 min				☐
Chin Up PULL SHOULDER BLADES DOWN AND MILDLY ARCH YOUR MIDDLE AND UPPER BACK TO ANGLE YOUR CHEST SLIGHTLY UPWARD Swap: Assisted Chin Up or Neutral-Grip Lat Pulldown	2	12-15	~7-8	2-3 min				☐
DB Hip Thrust LIFT YOUR HIPS OFF THE GROUND BY DRIVING YOUR HEELS INTO THE GROUND AND SQUEEZING YOUR BUTTOCKS MUSCLES Swap: Barbell Hip Thrust or Glute Focused Leg Press	2	12-15	10	1-2 min				☐
Single Arm 45° Cable Rear Delt Fly KEEP YOUR TORSO UPRIGHT WITH YOUR CHEST UP THROUGHOUT THE SET, MOVE THROUGH THE FULL RANGE OF MOTION YOUR SHOULDER MOBILITY PERMITS, WHICH SHOULD RESULT IN YOUR ELBOWS BEING SLIGHTLY BEHIND YOUR SHOULDERS OR AT LEAST HORIZONTALLY LEVEL WITH YOUR SHOULDERS AT THE END RANGE Swap: Reverse Pec Deck or Seated Face Pull	2	12-15	10	1-2 min				☐
Cable Lateral Raise RAISE YOUR ARM THROUGH SHOULDER MOTION AND ALLOW YOUR SHOULDER BLADE TO MOVE NATURALLY, THE REST OF YOUR BODY SHOULD REMAIN STATIONARY Swap: DB Lateral Raise or Pin Loaded Machine Lateral Raise	2	12-15	10	1-2 min				☐
Seated Leg Curl PULL YOUR TOES AND FEET BACK TOWARD YOUR SHINS BY MOVING AT YOUR ANKLES, AND MAINTAIN THIS ANKLE POSITION THROUGHOUT YOUR SET Swap: Lying Leg Curl or Single-Leg Lying Leg Curl	2	12-15	~8-9	1-2 min				☐

Weekly Notes

PART FOUR

Weeks 9 – 12

Three full-body workouts a week. Log every set — the numbers on this page are how you know it's working.

Workout A – Squat & Push Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Smith Machine Squat <i>your neck should be near a neutral position, like when you are normally standing upright. as you descend, it is natural for your torso to lean forward mildly at your hips, but avoid letting your lower back round or chest cave down from upper back rounding, keep your face straight ahead dont look down when squatting because igt will cause upper back rounding. it is also very important to do full ROM when doing qauts if your unable to go all the way done, lower the weight.</i> Swap: Barbell Back Squat or DB bulgarian Split	3	8-10	~7-8	3-5 min				☐
DB Bench Press <i>Throughout your set, keep your feet flat on the floor and your buttocks, upper back, and head in contact with the bench. at the end of the lifting phase, the dumbbells should be situated vertically over your shoulders</i> Swap: Barbell Bench Press or Machine Chest Press	3	10-12	~7-8	3-5 min				☐
Wide Grip Pull Up <i>While hanging on the bar straight elbows, simultaneously pull your shoulder blades down and mildly arch your middle and upper back to angle your chest slightly upward</i> Swap: Widel Grip Lat Pulldown or Assisted Pull Up	2	12-15	~7-8	2-3 min				☐
DB Romian Deadlift <i>Brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for smeone to strike your stomach with a punch. while allowing your knees to bend midly, sit your buttocks backward to hinge at your hips in a controlled manner as you keep you lower back flat, chest up, and core braced Close Grip smith machine</i> Swap: Barbell RDL or Stiff-leg Deadlift	2	8-10	~7-8	2-3 min				☐
Bench Press <i>Drive your feet into the ground and squeeze your glutes. simultaneously brace your core by tensing the front and sides of your abdominals outward, like you would if you were bracing for someone to strike your stomach with a punch or forcible slap. focus on keeping your shoulder blades pulled back together to avoid losing your upper back tightness</i> Swap: Assisted Dip or Plate Loaded Dip	2	10-12	10	1-2 min				☐
Seated Calf Raise <i>in a controlled manner, allow your heels to descend toward the ground through the available motion of your ankles. push through the balls of your feet to raise your heels into the air, at the top, your heels should be higher than the balls of your feet</i> Swap: Leg Press Calf Raise or Standing Calf Raise	3	10-12	10	1-2 min				☐
Incline Bicep Curl <i>curl both dumbbells upward by bending at your elbows while keeping your upper arms fixed at</i>								

Workout B – Hinge & Pull Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

EXERCISE & TECHNIQUE CUE	SETS	REPS	RPE	REST	WEIGHT	REPS	RPE	✓
Barbell RDL LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN. Swap: Barbell RDL or Deficit Conventional Deadlift	3	8-10	~7-8	3-5 min				☐
DB Shoulder Press PRESS THE DUMBBELLS UPWARD BY DRIVING YOUR ELBOWS UPWARD AND INWARD IN AN ARCHING MANNER AS YOU PROGRESSIVELY STRAIGHTEN YOUR ELBOWS UNTIL THEY ARE FULLY STRAIGHTENED WITH YOUR ARMS DIRECTED STRAIGHT UP TOWARD THE CEILING Seated Neutral Grip Cable Swap: DB shoulder Press or Machine Shoulder press	2	10-12	~7-8	3-5 min				☐
Row Row chest supported row PULL THE BAR BACK TOWARD YOUR TORSO BY DRIVING YOUR ELBOWS BACKWARD WHILE STIMULTANEOUSLY BENDING THEM AND PULLING YOUR SHOULDER BLADES TOGETHER Accentuated Eccentric Swap: Incline Chest Supported DB or	2	12-15	10	2-3 min				☐
Leg Extension FULLY BEND ONE KNEE TO PULL THAT SIDES LEG AWAY FROM THE SHIN PAD WHILE CONTINUING TO KEEP YOUR OTHER LEG AGAINST THE PAD Swap: Single-Leg Leg extension or Leg extension	3	12-15	10	1-2 min				☐
Peck Deck PULL YOUR SHOULDER BLADES BACK TOGETHER AND KEEP YOUR CHEST UP (KEEP THEM LIKE THIS THE WHOLE SET) PULL YOUR ARMS TOGETHER AS THE HANDLES MOVE TOWARD EACH OTHER UNTIL THEY ARE JUST ABOUT TO CONTACT EACH OTHER OR UNTIL THEY LIGHTLY CONTACT EACH OTHER Swap: Cable Flye or DB Flye	2	12-15	~7-8	1-2 min				☐
Ab Wheel Rollout DONT JUST BEND AT YOUR HIPS, USE YOUR ABS TO LOWER YOURSELF DOWN UNDER CONTROL AND PULL YOURSELF BACK UP. IF YOU DONT HAVE THE CORE STRENGTH TO GET ALL THE WAY EXTENDED AT THE BOTTOM, TRY TO PROGRESSIVELY INCREASE THE ROM WEEK TO WEEK Swap: Machine Crunch or Cable Crunch	2	12-15	10	1-2 min				☐
DB Skull Crusher Swap: Overhead Cable Extension or EZ bar Skull Crusher	3	12-15	~8-9	1-2 min				☐

Weekly Notes

Workout C – Lunge & Shoulder Focus

Tempo: 2-0-1-0 (controlled lower, no pause, steady lift) unless noted. Warm up first — see p.5.

FITNESSFORGE

Measurement Tracker

Measure every 2–4 weeks, same time of day, relaxed muscles.

`${['Chest','Waist','Hips','Left Arm','Right Arm','Left Thigh','Right Thigh','Calves'].map(m⇒`').join('')}`

MEASUREMENT	WEEK 1	WEEK 4	WEEK 8	WEEK 12
<code>\${m}</code>				

Strength & Personal Best Tracker

Log your best working set for these key lifts as you progress.

`${['Back Squat','Barbell Bench Press','Deadlift','Barbell Overhead Press','Chest-Supported Row','Wide Grip Lat Pulldown'].map(m=>``).join('')}`

LIFT	WEEK 1	WEEK 4	WEEK 8	WEEK 12 (PB)
<code>\${m}</code>				

QUICK WIN

Every time you beat a previous top set — more weight, more reps, or better RPE at the same weight — write it here. Small wins add up fast.

Habit Tracker

Week of: _____. Tick each day you complete the habit.

`${['Trained today','Hit protein target','Drank enough water','Slept 7+ hours','10k+ steps'].map(m⇒``).join('')}`

HABIT	M	T	W	T	F	S	S
<code>\${m}</code>							

Daily Wellness Tracker

Rate 1–5 each day — patterns here often explain plateaus before the scale does.

`${['Mon','Tue','Wed','Thu','Fri','Sat','Sun'].map(d⇒` `).join('')}`

DAY	ENERGY (1–5)	SLEEP QUALITY (1–5)	RECOVERY / SORENESS (1–5)

PART SIX

Exercise Library

Every primary exercise in the programme — muscles worked, technique, and the mistakes to avoid.

Back Squat

[QR / Video
Link Here](#)**QUADRICEPS, GLUTES****HAMSTRINGS, CORE, LOWER BACK****COACHING CUE**

GRASP EACH SIDE OF THE BAR WITH A SOMEWHAT WIDER THAN SHOULDER WIDTH GRIP THAT FEELS COMFORTABLE FOR YOU. MAKE SURE TO SQUAT THROUGH THE FULL RANGE OF MOTION. IF YOU CAN'T, LOWER THE WEIGHT. HAVE YOUR FEET AT A SHOULDER WIDTH STANCE.

COMMON MISTAKE

Cutting the squat short (not reaching full depth) to move more weight.

Barbell Bench Press

[QR / Video
Link Here](#)**CHEST****FRONT SHOULDERS, TRICEPS****COACHING CUE**

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Flaring the elbows straight out to 90° instead of tucking to ~45°.

Wide Grip Lat Pulldown

QR / Video
Link Here

LATS

BICEPS, MID-BACK

COACHING CUE

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Yanking the bar down with momentum instead of pulling with the lats.

Romanian Deadlift

QR / Video
Link Here

HAMSTRINGS, GLUTES

LOWER BACK

COACHING CUE

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE CABLE MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Rounding the lower back to chase extra range of motion.

Assisted Dip

QR / Video
Link Here

CHEST, TRICEPS

FRONT SHOULDERS

COACHING CUE

TUCK YOUR ELBOWS AT A 45 DEGREE ANGLE AND LEAN YOUR TORSO FORWARD 15 DEGREES.

COMMON MISTAKE

Letting the shoulders roll forward instead of staying braced.

Standing Calf Raise

QR / Video
Link Here

CALVES

—

COACHING CUE

PUSH THROUGH THE BALLS OF YOUR FEET TO RAISE YOUR HEELS FULLY UPWARD WHILE KEEPING YOUR KNEES STRAIGHT AND YOUR TRUNK UPRIGHT. DON'T BOUNCE.

COMMON MISTAKE

Bouncing out of the bottom instead of a controlled full stretch.

EZ Bar Bicep Curl

QR / Video
Link Here

BICEPS

FOREARMS

COACHING CUE

KEEP YOUR UPPER ARMS FIXED AT YOUR SIDES (RATHER THAN ALLOWING YOUR UPPER ARMS TO SWING FORWARD).

COMMON MISTAKE

Swinging the torso and upper arms to heave the weight up.

Deadlift

QR / Video
Link Here

GLUTES, HAMSTRINGS, BACK

CORE, TRAPS

COACHING CUE

BRACE YOUR LATS, CHEST TALL, HIPS HIGH, PULL THE SLACK OUT OF THE BAR PRIOR TO MOVING IT OFF THE GROUND

COMMON MISTAKE

Letting the hips rise faster than the chest at the start of the pull.

Barbell Overhead Press

QR / Video
Link Here

SHOULDERS

TRICEPS, UPPER CHEST

COACHING CUE

SQUEEZE YOUR GLUTES TO KEEP YOUR TORSO UPRIGHT, CLEAR YOUR HEAD OUT OF THE WAY, PRESS UP AND SLIGHTLY BACK

COMMON MISTAKE

Arching the lower back excessively instead of bracing the core.

Chest-Supported Row

QR / Video
Link Here

MID-BACK, LATS

BICEPS, REAR SHOULDERS

COACHING CUE

Row Seated Neutral Grip Cable Row FOCUS ON SQUEEZING YOUR SHOULDER BLADES TOGETHER AS YOU PULL THE WEIGHT TOWARDS YOU. KEEP YOUR SHOULDERS DOWN (AVOID SHRUGGING).

COMMON MISTAKE

Using momentum instead of squeezing the shoulder blades together.

Leg Extension

QR / Video
Link Here

QUADRICEPS

—

COACHING CUE

FOCUS ON SQUEEZING YOUR QUADS TO MAKE THE WEIGHT MOVE

COMMON MISTAKE

Slamming the weight stack instead of a slow, controlled squeeze.

Cable Flye

QR / Video
Link Here

CHEST

FRONT SHOULDERS

COACHING CUE

KEEP YOUR ELBOWS SLIGHTLY BENT AT A CONSTANT ANGLE WHILE SQUEEZING YOUR PECS TO MOVE THE WEIGHT

COMMON MISTAKE

Bending the elbows more as the set gets harder, turning it into a press.

Cable Crunch

QR / Video
Link Here

ABS

—

COACHING CUE

FOCUS ON FLEXING YOUR SPINE (ROUNDING YOUR BACK), DON'T YANK YOUR HEAD WITH YOUR ARMS

COMMON MISTAKE

Pulling with the arms and hips instead of flexing the spine.

DB Skull Crusher

QR / Video
Link Here

TRICEPS

—

COACHING CUE

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Letting the upper arms drift forward, taking tension off the triceps.

DB Walking Lunge

QR / Video
Link Here

QUADRICEPS, GLUTES

HAMSTRINGS, CORE

COACHING CUE

10 STEPS EACH LEG. TAKE MEDIUM STRIDES, LET YOUR TORSO LEAN FORWARD

COMMON MISTAKE

Taking steps too short, which limits range of motion and glute activation.

DB Incline Press

QR / Video
Link Here

UPPER CHEST

FRONT SHOULDERS, TRICEPS

COACHING CUE

USE ~45° INCLINE. MIND MUSCLE CONNECTION WITH UPPER PECS.

COMMON MISTAKE

Setting the incline too steep, turning it into a shoulder press.

Reverse Grip Lat Pulldown

QR / Video
Link Here

LATS

BICEPS

COACHING CUE

PULL YOUR ELBOWS DOWN AGAINST YOUR SIDES, USE SHOULDER WIDTH GRIP

COMMON MISTAKE

Leaning back excessively and turning the pull into a row.

Barbell Hip Thrust

QR / Video
Link Here

GLUTES

HAMSTRINGS

COACHING CUE

TUCK YOUR CHIN AND RIB CAGE DOWN, ONLY MOVE YOUR HIPS. USE A PAD

COMMON MISTAKE

Hyperextending the lower back instead of moving through the hips only.

Seated Face Pull

QR / Video
Link Here

REAR SHOULDERS, UPPER BACK

ROTATOR CUFF

COACHING CUE

PULL YOUR ARMS BACK AND OUT

COMMON MISTAKE

Pulling with straight arms instead of driving the elbows back and out.

DB Lateral Raise

QR / Video
Link Here

SIDE SHOULDERS

—

COACHING CUE

RAISE THE DUMBBELL "OUT" NOT "UP", MIND MUSCLE CONNECTION WITH MIDDLE FIBERS

COMMON MISTAKE

Using momentum and shrugging the traps instead of raising with the shoulder.

Lying Leg Curl

QR / Video
Link Here

HAMSTRINGS

CALVES

COACHING CUE

FOCUS ON SQUEEZING YOUR HAMSTRINGS TO MAKE THE WEIGHT MOVE

COMMON MISTAKE

Letting the hips rise off the pad during the curl.

Bulgarian Split Squat

QR / Video
Link Here

QUADRICEPS, GLUTES

HAMSTRINGS, CORE

COACHING CUE

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Placing the front foot too close, overloading the knee joint.

Chin Up

QR / Video
Link Here

LATS, BICEPS

MID-BACK

COACHING CUE

LEAN YOUR TORSO BACK AT YOUR HIPS BUT MAKE SURE THE BAR MOVES IN A STRAIGHT LINE AND PULL YOUR ELBOWS STRAIGHT DOWN.

COMMON MISTAKE

Using short, partial reps instead of a full stretch at the bottom.

Single Arm 45° Cable Rear Delt Fly

QR / Video
Link Here

REAR SHOULDERS

UPPER BACK

COACHING CUE

KEEP YOUR TORSO UPRIGHT WITH YOUR CHEST UP THROUGHOUT THE SET, MOVE THROUGH THE FULL RANGE OF MOTION YOUR SHOULDER MOBILITY PERMITS, WHICH SHOULD RESULT IN YOUR ELBOWS BEING SLIGHTLY BEHIND YOUR SHOULDERS OR AT LEAST HORIZONTALLY LEVEL WITH YOUR SHOULDERS AT THE END RANGE

COMMON MISTAKE

Turning the movement into a row by bending the elbow too much.

Seated Leg Curl

QR / Video
Link Here

HAMSTRINGS

—

COACHING CUE

PULL YOUR TOES AND FEET BACK TOWARD YOUR SHINS BY MOVING AT YOUR ANKLES, AND MAINTAIN THIS ANKLE POSITION THROUGHOUT YOUR SET

COMMON MISTAKE

Using a fast, jerky tempo instead of a controlled squeeze.

Ab Wheel Rollout

QR / Video
Link Here

ABS, CORE

LATS, SHOULDERS

COACHING CUE

DONT JUST BEND AT YOUR HIPS, USE YOUR ABS TO LOWER YOURSELF DOWN UNDER CONTROL AND PULL YOURSELF BACK UP. IF YOU DONT HAVE THE CORE STRENGTH TO GET ALL THE WAY EXTENDED AT THE BOTTOM, TRY TO PROGRESSIVELY INCREASE THE ROM WEEK TO WEEK

COMMON MISTAKE

Letting the lower back sag instead of keeping the core braced throughout.

PART SEVEN

FAQ & Closing

Answers to what beginners ask most, plus your next steps after Week 12.

FREQUENTLY ASKED QUESTIONS

Your Questions, Answered

What if I miss a workout?

Just pick back up where you left off. Don't try to "double up" — move the whole week along and keep going.

What if I can't hit the prescribed reps?

Do as many quality reps as you can at the target RPE, log the real number, and try to beat it next time. That's still progress.

Can I add extra exercises?

You can, but this programme is already dosed for good results — extra volume usually adds fatigue without adding much extra growth.

What if my gym doesn't have an exercise?

Use Substitution Option 1 or 2 listed on the workout page — they train the same muscles in a very similar way.

How much cardio should I do alongside this?

2–3 easy-to-moderate sessions a week is plenty (see p.13). More isn't automatically better while you're building muscle.

More Answers

Do I need a gym, or can I do this at home?

This programme is written for a standard commercial gym with barbells, dumbbells, cables and machines.

I'm sore — should I still train?

Mild soreness is normal and fine to train through. Sharp or joint pain is different — swap the exercise and consider a lighter session.

How do I know if I'm eating enough protein?

Use the Plate Method (p.12) and aim for a palm-sized portion at every meal — that alone gets most people close to target.

What if the weight feels too easy or too hard?

Trust the target RPE over the number on the plate — adjust weight up or down so your last set actually matches the prescribed RPE.

Can beginners really build muscle and lose fat at once?

Yes — this is well documented in newer lifters (see p.6, Science Behind It). It gets harder as you gain experience, but right now it's a real advantage.

Congratulations

You did the thing most people only talk about — you finished 12 weeks of real, structured training.

Every workout logged, every set pushed close to the target RPE, every week checked in on — that consistency is exactly what separates people who get results from people who just collect fitness advice.

REMEMBER THIS

Whatever the scale, tape measure or mirror says today, you now have a skill for life: you know how to run a real training programme.

Take a moment before you move on — flip back to your Week 1 photos and numbers. Compare them to today.

What To Do After Week 12 & How To Keep Progressing

1. Take A Deload Week

Train at roughly 50–60% of your usual sets and weights for one week. This lets your joints and nervous system fully recover before the next block.

2. Review Your Data

Look at your Strength Tracker, measurements and photos. Where did you improve most? Where did progress stall?

3. Increase The Challenge

Repeat this programme with a fresh 12-week block, adding a little more volume or intensity, or move to an intermediate split.

4. Keep The Habits

The logging, the check-ins, the plate-method meals — keep all of it running. Habits are what make results last.

RECOMMENDED NEXT STEP

Ready For What's Next?

When you're ready to keep building, FitnessForge's next programme takes your new foundation further with intermediate programming and advanced nutrition strategy. Keep an eye on your inbox.

You put in the work. That's the hard part — and you already did it.
